Our goal is to collaborate with you to create a plan that prevents financial strain. Please be proactive in understanding your insurance and patient financial obligations from the start of your treatment.

We'll review your insurance benefits and help set up a payment plan for your treatment. It's recommended to maintain a low balance to prevent new debt during your recovery. We're committed to helping you finish treatment without a balance owed.

We keep track of patient balances and payment plans on a weekly basis and very much see this as a joint responsibility with you. If you need to make changes to your payment plan, let us know and we will help you.

Should you have any questions, our accounts receivable department can be reached at 651-777-5222.
